EDUCATION

Northeastern University

May 2027

Candidate for a B.S in Computer Science and Game Development

Boston, MA

Khoury College of Computer Sciences

Coursework: *Algorithms and Data, Computer Systems, Distributed Systems, Software Engineering*

SKILLS

Programming Languages: Java, C++, C#, Python, Javascript, HTML/CSS

Infrastructure/Frameworks: Git, Bazel, Make, AWS (Lambda, SQS, IoT Core), RabbitMQ, REST APIs, Webhooks, Apache Beam, Java Spring, MySQL, PostgreSQL, Supabase, Sentry, Docker, Bash, Linux, npm

EXPERIENCE

Generate Product Development Studio

August 2025 – Present

Project Lead & Infrastructure Engineer

Boston, MA

- Directed 5 engineers and 4 designers building Prisere, a platform for small-medium sized businesses to understand mitigation strategies for natural disasters.
- Built observability tooling using Sentry for four project teams, standardizing error tracking and reducing mean time to resolution for tech leads.
- Implemented and deployed internal Slack bot using Slack API and Supabase to match 15+ new members with experienced mentors based on skills and interests.

Budderfly

August 2025 – December 2025

Software Engineering Intern

Boston, MA

- Architected an event-driven HVAC alert pipeline, processing device metrics from 10k+ units in 1k+ customer sites, delivering real-time notifications to customers.
- Built distributed message routing across multiple microservices, leveraging AWS IoT Core and Lambda for metric ingestion with RabbitMQ and SQS for inter-service messaging.
- Designed fault-tolerant infrastructure with on-device caching and dead-letter queues, ensuring message durability and failure handling across the full alert lifecycle.

Google

May 2025 – August 2025

Associate Software Developer Intern

Sunnyvale, CA

- Integrated internal IDE with logging tools, streamlining the most common workflow for debugging internal services.
- Analyzed data pipeline performance metrics and collaborated with engineering to optimize processing of 100+ TB daily data, reducing processing time by 15% and improving the developer experience.
- Conducted user research with developers and UX engineers, identifying key pain points that informed product decisions and drove a 30% increase in developer satisfaction.
- Directly impacted the developer workflow for 7k+ monthly active users on a platform serving 100k+ developers across Google's codebase.

PROJECTS

Prisere | *Presentation*

August 2025 – December 2025

- Translated business requirements into actionable technical specifications with defined acceptance criteria.
- Collaborated with engineers to scope system architecture and prioritize backend/frontend features.
- Managed Agile workflows and milestone tracking, ensuring design-to-code alignment throughout development time.

Silesia | *Unity, C#*

July 2024 – August 2024

- Coordinated project management for a team of 10 students, successfully delivering a culturally rich game about Silesia while overcoming language barriers and meeting all four milestone deadlines.
- Maintained team cohesion across cultural barriers to deliver an MVP in four weeks.
- Received high praise from industry mentors for innovative and complex storytelling.
