EDUCATION

Northeastern University

May 2027

*Candidate for a B.S in Computer Science and Game Development
Khoury College of Computer Sciences*

Boston, MA

Coursework: Algorithms and Data, Object Oriented Design, Computer Systems, Introduction to Databases

SKILLS

Programming Languages: Java, C++, C#, C, Python, SQL

Frameworks/Platforms: Apache Beam, Spring Framework, AWS (Lambdas, SQS, IoT Core), RabbitMQ, Unity

Developer Tools: Git, Bash, Linux, Bazel, Docker

Product Management: Agile/Scrum, Jira, Trello, Confluence, Notion, Slack, Office Suite

EXPERIENCE

Budderfly

August 2025 – December 2025

Software Engineering Intern

Boston, MA

Generate Product Development Studio

August 2025 – Present

Project Lead

Boston, MA

- Directing five software engineers and four designers to create a platform for small-medium sized businesses to understand mitigation strategies for natural disasters.
- Communicated early project roadblocks to client, securing necessary resources to quickly resolve issues and prevent week-long delays during early development.
- Created detailed product design documents to secure product alignment with stakeholders, resulting in a 20% reduction in scope creep and clear project milestones.

Google

May 2025 – August 2025

Associate Software Developer Intern

Sunnyvale, CA

- Integrated internal IDE with logging tools, streamlining the most common workflow for debugging internal services.
- Analyzed data pipeline performance metrics and collaborated with engineering to optimize processing of 100+ TB daily data, reducing processing time by 15% and improving the developer experience.
- Conducted user research with developers and UX engineers, identifying key pain points that informed product decisions and drove a 30% increase in developer satisfaction.
- Directly impacted the developer workflow for 7k+ monthly active users, within a platform serving 100k+ developers across Google's codebase.

Polish-Japanese Academy of Information Technology

July 2024 – August 2024

Project Lead

Warsaw, PL

- Managed a multicultural team of Polish and Ukrainian students in developing a short game, incorporating weekly feedback from numerous game studios to improve game quality by 30%.
- Implemented Agile methodologies, leading daily stand-ups and sprint planning sessions, improving team productivity by 40% and ensuring on-time delivery of game milestones.
- Showcased the developed game to 335k+ attendees at Gamescom in Cologne, Germany, garnering interest from two potential publishers.

PROJECTS

Prisere | *Presentation*

August 2025 – December 2025

- Orchestrated a cross-functional team of 12 (engineers and designers) to build a B2B disaster mitigation platform, serving as the primary liaison between stakeholders and technical teams.
- Translated client business goals into actionable technical specifications and user stories, enabling the engineering team to prioritize critical MVP features.
- Established Agile development cycles and milestone tracking, ensuring alignment between design prototypes and final software.

Silesia | *Unity, C#, Agile*

July 2024 – August 2024

- Coordinated project management for a team of 10 students, successfully delivering a culturally rich game about Silesia while overcoming language barriers and meeting all four milestone deadlines.
- Maintained team cohesion across cultural barriers to deliver an MVP in four weeks.
- Received high praise from industry mentors for innovative and complex storytelling.
